Most people eat more than is good for them. The stomach tries to digest all that's put into it, but if repeatedly everloaded, it goes on a strike. That's indigestion. Rich, over-sweet, indigestible food weakens the stomach and makes it unable to take care of the material put into it. More food taken into a weakened stomach than the stomach can digest, stays there, forms gases and rots, bringing on all the horrors of dyspepsia. The only way to cure dyspepsia is to clean out the digestive canal with CASCARETS. Keep it clean with Cascarets, eat light food sparingly, and give the stomach a chance to rest up and get strong again.
